I am a third-year student in Software Engineering at Concordia University. Work experience also allowed me to acquire many skills; those thought me to structure my work, analyse complex issues and find creative solutions. I am professional, social and enthusiast. I strive to make myself as useful as possible and to develop better solutions for the company.

Summary of skills

Speak and write: French and English

Software: Great adaptability to any software and database

Programing: JAVA, Web and SQL

Soft skills: Training, follow up, data analysis, customer service and process/project management
