

## About me, and my aspirations

---

I am a person that takes great joy in working and improving the operation of the company I work for. I like to think that I make a difference and that my presence has a positive impact. I differentiate myself due to my capacity to think outside the box and to adapt to new situations. My ability to see problems globally, and to initiate rapid consensual decision making and to bring structure through robust processes and associated training, makes me an excellent candidate for a leadership role. My job must be challenging and must provide me with new experiences. I am also very interested in working abroad for periods of more than 6 months.

I am looking for an employer who values the development of both my professional and personal skills and competencies, through mentoring and continuous education programs. Finally, I am looking for an organization that will allow me to grow through functions of greater responsibility.

## Summary of skills

---

**Speak and write:** French and English

**Software:** Microsoft Office, Google Workspace and a great adaptability to any software

**Programing:** OOP, Web, Android and SQL

**Soft skills:** Project and product management, training, data analysis, process deployment and documentation, and customer service
